## Features

- Forward current:  $\leq 30\text{mA}$
- Typical view angle 50% I<sub>v</sub>: 50°
- RoHS2.0 and REACH-compliant
- Lens color: black
- Qualified according to JEDEC moisturevity Level 2a
- ESD level 6kV(HBM)

## Applications

- Indoor signage display applications
- Flat backlight for LCD. Switch and symbol
- Indicator and backlighting for all consumer electronics
- Special application

**■ Dimensions**

---

- Notes:
1. All dimensions are in millimeters
  2. Tolerance is  $\pm 0.1$  mm unless otherwise noted
  3. Specifications are subject to change without notice.

■ **Reflow Profile**

**1. IR reflow soldering Profile for Lead Free solder**

**2. IR reflow soldering Profile for Lead solder**

**Notes:**

1. We recommend the reflow temperature 240°C (±5°C).the maximum soldering temperature should be limited to 260°C.
2. Don't cause stress to the silicone resin while it is exposed to high temperature.
3. Number of reflow process shall be less than 3 times.

**■ Test Circuit and Handling Precautions**

---

**1. Test circuit**

**2. Handling precautions**
**2.1. Over-current-proof**

Customer must apply resistors for protection; otherwise slight voltage shift will cause big current change (Burn out will happen).

**2.2. Storage**

1). It is recommended to store the products in the following conditions:

Humidity: 60% R.H. Max.

Temperature: 5°C~30°C (41°F~86°F)

2). Shelf life in sealed bag: 12 month at <5°C~30°C and <60% R.H. after the package is Opened, the products should be used within a week or they should be keeping to stored at  $\leq 20\%$ R.H. with zip-lock sealed.

**2.3. Baking**

It is recommended to baking before soldering when the pack is unsealed after 24hrs.

The Conditions are as followings:

1). 60±3°C X 24hrs and <5%RH, for reel

2). 125±3°C X 2hrs, for single LED

It shall be normal to see slight color fading of carrier (light yellow) after baking in process

■ Packing

● Feeding Direction (Unit: mm)

● Dimensions of Reel (Unit: mm)

● Dimensions of Tape (Unit: mm)

● Arrangement of Tape

Notes:

1. Empty component pockets are sealed with top cover tape
2. The max loss number of SMD is 2pcs
3. The cathode is oriented towards the tape sprocket hole in accordance with ANSI/EIA RS-481

■ Packing

● Packaging specifications

**Notes:**

Reeled product (max.4,000) is packed in a sealed moisture-proof bag. Six bags are packed in an inner box (size: about 260 X 230 X 100 mm) and four inner boxes are in an outer box (size: about 480 X 275 X 215 mm). On the label of moisture-pooof bag, there should be the information of Part No., Lot No. and quantity number; also the total quantity number should be on inspection request form on outer box.

**■ Precautions**

---

**1. Abnormal situation caused by improper setting of collet**

To choose the right collet is the key issue in improving the product's quality. LED is different from other electronic components, which is not only about electrical output but also for optical output. This characteristic made LED more fragile in the process of SMT. If the collet's lowering down height is not well set, it will bring damage to the gold wire at the time of collet's picking up and loading which will cause the LED fail to light up, light up now and then or other quality problems

**2. How to choose the collet**

During SMT, please choose the collet that has larger outer diameter than the lighting area of lens, in case that improper position of collet will damage the gold wire inside the LED. Different collets fit for different products, please refer to the following pictures cross out

**Outer diameter of collet should be larger than the lighting area**

**Picture 1(√)**

**Picture 2(X)**

**3. Other points for attention**

- A. No pressure should be exerted to the epoxy shell of the SMD under high temperature.
- B. Do not scratch or wipe the lens since the lens and gold wire inside are rather fragile and cross out easy to break.
- C. LED should be used as soon as possible when being taken out of the original package, and should be stored in anti-moisture and anti-ESD package.

**4. This usage and handling instruction is only for your reference.**
